Bad air quality

WHAT DOES IT DO TO MY OVERALL SCHOOL PERFORMANCE ?

i3CAIR
Care about your air.

Why air quality should be a priority ?

How monitoring indoor air quality becomes more relevant

1. Health and wellbeing

We spend almost **90% of our time indoors** and indoor air can be almost **100 times more polluted than outdoor air**. The quality of our air indoors can have significant impact on students health and wellbeing.

2. Classroom performance

Indoor air quality not only impacts health and wellbeing, but also productivity, energy and focus levels. Take control of your indoor air quality

3. Reduce the Spread of Viruses

Temperature, humidity, carbon dioxide levels and particulate matter all play a crucial role in the spread of viruses. Keep your classroom safe by monitoring these parameters in real-time and receive alerts when to take action.

i3CAIR

We cair about your air

That's why we invented i3CAIR, a **professional air quality sensor**. The basic configuration provides you with the tools you need to follow-up on indoor air quality in an individual office space, meeting room or classroom.

The i3CAIR Wellbeing Index allows you to have full visibility of the temperature, humidity, CO2 levels, and particulate matter, and alerts you when you need to take action to improve ambient conditions.

- ✓ Multi-room support
- ✓ Cloud application
- ✓ Notifications
- ✓ Connect, set and forget
- ✓ Real-time widget

 Whitepaper

 Video introduction

It's part of the best digital whiteboard in the world.

We've upgraded the capability of i3TOUCH displays by adding a set of accessories and extending the functionality beyond anything currently available on the market.

The powerful combination of the i3TOUCH interactive display, i3CAIR indoor air quality sensor, i3RDM cloud-based dashboard and the i3CAMERA Pro 4K camera gives you the most advanced solution on the market. Take your lessons and meetings to the next level.

Innovation designed with only one thing in mind: **you**
